How to Reach Our Nurseries

THE WESTON NURSERIES are located in the southern part of the town of Weston on Route 30 (four miles from Newton; eight miles from Brookline). Route 30 is the Boston to Framingham route over Commonwealth Avenue. The Main Nurseries are at 85 Winter Street which is the first public road on your left after crossing Wellesley Street.

From the Boston-Worcester Turnpike take the Weston Road at Wellesley for $2\frac{1}{2}$ miles and turn left on Brown Street at the new aqueduct.

— WE ARE CLOSED TO BUSINESS ON SUNDAYS —

THE spirit of gardening is captivating the American home-front. Its limits are boundless, and happily there will be no restrictions on gardens for food and beauty.

Garden lovers may question the patriotism of purchasing plant materials, in view of governmental regulations concerning travel. The map on the opposite page clearly shows that Weston Nurseries are situated in a central locality to Metropolitan Boston homes, where a minimum of driving and trucking is involved.

We cordially welcome visitors to our fields as we feel that our establishment has much to offer plant lovers. Should a personal visit be impossible, our delivery service or packing department will take prompt action on all telephone and mail orders received.

Plants grown at Weston Nurseries are well tested for hardiness, as the winters are long and severe on our open, unprotected fields. Our two hundred acres of evergreens, trees and shrubs have been transplanted often to develop strong, healthy roots. This is an assurance of continued successful growth in the plantings of our customers.

Weston Nurseries are growers of a complete assortment of plant materials, as listed in this catalogue.

— THE NURSERY IS CLOSED TO BUSINESS ON SUNDAYS —

Evergreens

Our evergreens have all been transplanted, sprayed and trimmed several times to insure a healthy, vigorous root system, and a full, compact top. The many types and varieties we list give one ample choice of texture, color and shape for that formal or informal planting, hedge, windbreak or specimen.

EVERGREEN GROUND COVERS

Ground covers are particularly adapted to transform that bank, slope or shady place into a beautiful carpet of green. In your paved terrace you may walk on clumps of Thyme and breathe in the fragrance of their crushed leaves.

Bearberry, Ivy, Pachysandra or Vinca will grow beautifully in that shady location where nothing else will do. For natural planting, the Christmas Fern, Polypody, Partridge-berry or Wintergreen, and Leatherwood Fern are all evergreen, to grow in the glade, near rocks or over boulders. Along with the aforementioned, Euonymus colorata, Pachistima and many others are planted underneath to cover over the bare soil and relieve the necessity of cultivation.

Broad-Leaved Evergreen Shrubs

In this group there are many varieties native to the East Coast. There are also varieties which have been introduced from other parts of the world. All require an acid soil, prepared with plenty of peat moss, leaf-mold or humus for successful growth.

Flowering Crabapples

The flowering crabapple is probably the most colorful and satisfactory of all small ornamental trees. Blooming when very young, they grow quite rapidly and develop into a small tree. Equally important as the profusion of colorful blossoms are the fruits of many colors and sizes that last far into the winter, providing food for many birds.

The Old Farm House

Hybrid Lilacs

We can rightfully pride ourselves on the collection of Hybrid Lilacs we have in the nursery. Most of our plants are on their own roots, in a variety of colors and sizes. Our heavy, full furnished plants can be used singly, or in a hedge.

If you can't imagine what 10,000 Lilacs look like when they are in bloom — pay a visit to our fields at lilac time. A real treat is in store for you. Choose your color and tag the plant for later delivery.

Conditions of Sale

IT is to our own interest to see that only good and correctly labeled plants leave the Nursery, but we give no guaranty, express or implied, as to description, growth and success of any stock we sell, for it depends on correct planting, proper soil, weather conditions, and the general care of the plants.

We accept all orders upon the condition that they shall be void should injury befall the stock from frost, fire, hailstorm, or other causes over which we have no control.

Any errors made by us will be gladly rectified if notice is given within ten days after receiving the stock. If any plants are found to be misnamed, we will replace them the next planting season.

We sell five plants of the same variety at the rate of ten; 25 plants at the rate of 100. Specimen plants at special prices.

All parcel post, express or freight charges are paid by the purchaser. On orders packed for shipment there is a small additional charge for packing, at cost.

A certificate of State inspection for freedom from injurious insects or disease on our plants will go with every order.
